PROFESSIONAL SUMMARY

Final-year Master's student in Big Data and Artificial Intelligence, expected to graduate in 2026, Experienced in building end-to-end AI-powered applications across LLMs, RAG, intelligent document processing, AI agents, computer vision, and data engineering pipelines. Seeking opportunities as an AI Engineer, Machine Learning Engineer, or Data Scientist.

EDUCATION

Master's in Big Data, AI and Advanced Applications (M2) — Ibn Tofail University | 2024-2026
Bachelor's in Mathematical and Computer Sciences — Ibn Tofail University | 2021-2024

WORK EXPERIENCE

AI Engineer Intern (Final-Year Internship) | Slaoui Global Capital - Casablanca *Mar 2026 – Present*

- Developed a full-stack **AI-powered insurance claims platform** covering clients, vehicles, contracts, claims, and supporting documents.
- Built an **intelligent document processing pipeline** combining Azure AI Document Intelligence (OCR) and Gemini to extract, validate, and structure information from insurance documents.
- Designed a **multimodal damage-assessment workflow** combining Computer Vision preprocessing and Gemini Vision to analyze accident Images and generate structured vehicle-damage descriptions.
- Developed an **AI fraud-detection agent** with **LangGraph**, orchestrating document, image, policy, and claim-history analysis to identify inconsistencies and generate explainable investigation reports.
- Developed backend services with **FastAPI** and **PostgreSQL**, integrating AI workflows into the insurance platform.

AI Engineer Intern | XAI - *Rabat* *Jun 2025 – Oct 2025*

- Developed an end-to-end Retrieval-Augmented Generation (**RAG**) platform that delivers context-aware answers from news data.
- Built the **data ingestion and semantic retrieval pipeline** using NewsAPI, **Google Generative AI embeddings**, MongoDB Atlas, and **KNN vector search**.
- Integrated the **Gemini LLM** with **LangChain** to generate accurate, context-grounded responses from retrieved evidence.
- Exposed the RAG system through a **FastAPI REST API**, containerized it with **Docker**, and implemented **CI/CD** using GitHub Actions.

PROJECTS

Moroccan Political Insight — Github

- Real-time Big Data pipeline monitoring political sentiment in Morocco: tweets streamed, cleaned, classified with an LLM, and visualized on an interactive dashboard to support transparent public-opinion analysis.
- **Tech stack:** Firebase, Kafka, Spark Streaming, Hadoop HDFS, Mistral 7B, Python, Streamlit, Pandas, NumPy, Matplotlib, Seaborn.

End-to-End Job Intelligence System — Github

- End-to-end pipeline for job-market analytics: web scraping, data cleaning, Oracle DB storage, Interactive dashboards, predictive modeling of in-demand jobs, and CV matching to help job seekers find relevant opportunities.
- **Tech stack:** Python, Requests, BeautifulSoup, Selenium, regex, Oracle SQL, PyQt5, scikit-learn, XGBoost, pdfminer, Pandas.

TECHNICAL SKILLS

Programming & Query Languages: Python, C, C++, Java, R, SQL, PL/SQL
AI & ML : PyTorch, TensorFlow, Scikit-learn, XGBoost, Hugging Face, LLMs, RAG, NLP, Computer Vision, OCR, CNN, Fine-tuning, Embeddings, OpenCV, YOLOv8, MONAI, LangChain, LangGraph
Data Engineering & Big Data: Pandas, NumPy, Matplotlib, Spark Streaming, Kafka, Hadoop HDFS, Pig, Hive, ETL/ ELT pipelines, PySpark,dbt, MinIO
Databases: MongoDB, MySQL, Oracle DB, PostgreSQL, Firebase, BigQuery
Web Scraping & Automation: Requests, BeautifulSoup, Selenium, regex, pdfminer
Tools & Platforms: Git/GitHub, Docker, Power BI, Jira, VS Code, Colab, Linux (Ubuntu)
Soft Skills: Collaboration, Communication, Planning, Teamwork, Time Management
Languages: Arabic (Native) | French (Fluent) | English (B2)

CERTIFICATIONS & ACTIVITIES

- AI Ethics Summer School 2025 — Pan-Africa Center for AI Ethics
- Learning AI Through Visualization — Columbia University
- Introduction to Generative AI — AWS
- Introduction to Career Skills in Data Analytics — Linkedin Learning
